

## SkyGuider Pro Firmware Upgrade Quick Guide

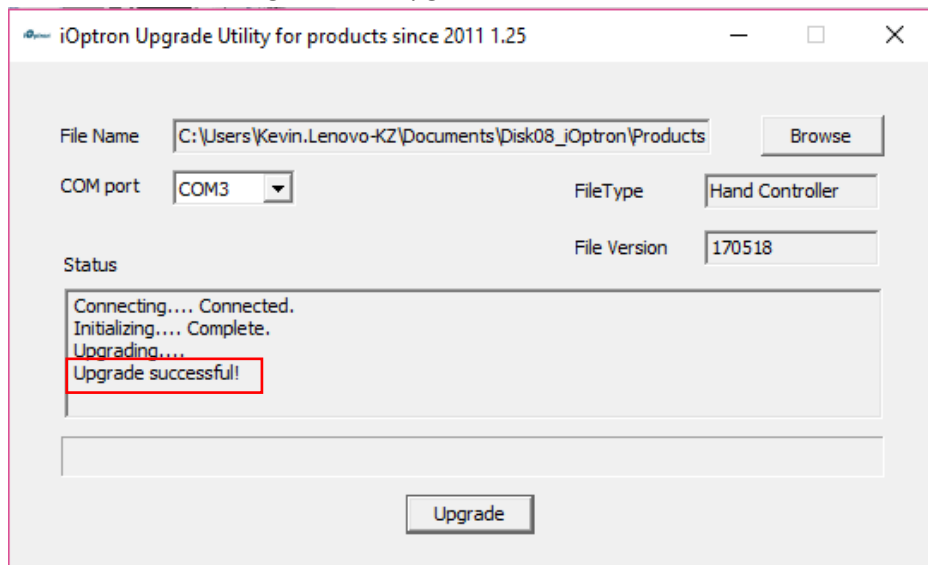

1. Download Upgrade Utility and SkyGuider Pro firmware.
2. Turn off the mount power. Connect the mount to a PC using USB cable
3. Hold and depress ◀ and ▶ buttons together when turn the mount power on. Now only the power indicator will be on. This indicates that the mount is entering upgrading mode.
4. Open computer Device Management to find assigned COM Port #, here is COM3.

5. Run Upgrade Utility by click on it. (1) Select SGPro firmware, (2) enter a correct COM port number from the pull-down menu, and (3) click Upgrade button on computer screen.

6. You'll see the following screen if upgrade is successful.

7. If the upgrade process is failed or interrupted, start over again.
